### **Operation Theatre in Department of Plastic Surgery (Baroda Medical College)**

We have always aimed at providing quality care and have strived for it. This has resulted in a state of art operation theatre with four OT tables.

State of the art operation theatre equipped with microscope, digital TOUR NIQUET , Maxillofacial drill system, IITV, Land T cautery system with monopolar and bipolar probes, all sophisticated systems for cosmetic surgery like liposuction canulas, laser, tattoo guns and other equipment.

Apart from the surgical management, we aim to provide an excellent infrastructure to cater to patients of all strata and make them feel at ease while in the hospital. The recent renovation of the pediatric ward is a glorious example of this. The open to sky effect with twinkling stars, a shining moon and pleasant murals and cartoons!! You have to see it to believe it. We are thankful to the Ashirwad foundation and department of Fine arts MS University, Baroda for achieving this.

One of the various unique achievements is the PROJECT MUSKAN. It is a humble effort on our part for empowering India – to achieve excellence in plastic surgery care. It is an effort to provide complete management to our patients till the process of rehabilitation. It is also an effort to provide quality care with latest modalities and recent advances in clinical reality to the deepest village of the state. Under the ongoing PROJECT MUSKAN- free treatment is provided to the patients- a very unique way of providing health care at the doorstep. We are thankful to Jeevan Akshay Charitable Trust- Our partners in the project. We encountered a few unique cases under project Muskan.
