

## Botanical Garden

The botanical garden of the department of Botany is located on the bank of a tributary of the River Vishwamiti. The garden is a store house of various rare plants. The garden has a collection of several Gymnosperms, Ferns and Cacti. The Garden also serves as a source of plant material required by various courses taught at the department as well as other departments in the faculty.

The following are the major feature of the Garden

- Area 4.62 acres
- 206 species of angiosperms
- 11 species of gymnosperms
- 12 species of ferns
- 7 species of Orchids

### A Virual Tour of the Garden
